

Technical RFQ specification sheet targeted for Shenzhen Fine Offset Electronics to configure and brand our custom hardware series.

1. Custom Firmware Default Settings

Gateways must be pre-flashed at the factory to target our Custom Ingestion API natively:

Parameter	Configuration Value
Protocol Type	Ecowitt (HTTP POST, URL-encoded)
Server/IP	api.chainmailsolutions.ai
Path	/api/ingest/ecowitt
Port	443 (HTTPS / SSL Enabled)
Upload Interval	60 seconds

2. Custom Colorway & Enclosure Branding

- **S-100 Gateway:** Silk-screened **Chainmail Sentinel** logo centered on the USB dongle casing.
- **S-700 Array:** Silk-screened or engraved Chainmail shield emblem centered on the wind baffle fin.
- **Color Scheme:** Dark Cobalt Blue (Pantone 295C) with Gold accent trim (Pantone 872C) representing the corporate brand color tokens.

FACTORY LOGGING REQUIREMENT

For every batch, the factory must supply a secure CSV file linking MAC Address, Serial Number, and a generated 32-character node activation token printed as a QR code insert inside the retail packaging.
